TRACEFINDER FORENSIC ANALYSIS REPORT

Report Generated:	2026-01-26 15:34:00
Document Analyzed:	EP01.pdf
Case ID:	CASE-20260126-153400
Analysis Type:	Scanner Identification

EXECUTIVE SUMMARY

This forensic analysis report presents the findings from the examination of the submitted document. Using advanced digital forensics techniques and machine learning algorithms, TraceFinder has identified the scanner device responsible for creating this document.

Primary Finding: The document was scanned using a **Unknown Unknown Scanner** scanner with a confidence level of **69.0% (Medium)**.

SCANNER DETECTION RESULTS

Parameter	Value
Scanner Brand	Unknown
Scanner Model	Unknown Scanner
Confidence Score	69.00%
Confidence Level	Medium
Detection Method	Multi-Factor Analysis

CONFIDENCE ANALYSIS

Confidence Score: 69.00%
Interpretation: Moderate - Results are probable but require additional verification

Contributing Factors:

• Low confidence: 69.0% (threshold: 75.0%)
• Digital fingerprint analysis completed

TECHNICAL ANALYSIS

Primary Indicators:

• Low confidence: 69.0% (threshold: 75.0%)

Secondary Indicators:

• This may not be a scanned document or the scanner model is not in our database

Observed Anomalies:

• Unable to confidently identify scanner - confidence below threshold

METADATA ANALYSIS

No EXIF metadata found in the document.

CONCLUSION

Based on comprehensive forensic analysis using TraceFinder's advanced detection algorithms, this document was scanned using a **Unknown Unknown Scanner** scanner. The analysis achieved a confidence score of **69.0%**, indicating a moderate level of reliability requiring additional verification.

This analysis employed multiple forensic techniques including metadata extraction, digital fingerprint analysis, and machine learning-based pattern recognition to ensure accurate scanner identification.
